HTML Language Code Reference

[< Previous](#)[Next >](#)

ISO Language Codes

You should always include the [lang](#) attribute inside the [<html>](#) tag, to declare the language of the Web page. This is meant to assist search engines and browsers:

```
<html lang="en">
...
</html>
```

In XHTML, the language is declared inside the [<html>](#) tag as follows:

```
<html xmlns="http://www.w3.org/1999/xhtml" lang="en" xml:lang="en">
...
</html>
```
